-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 15-17 have been considered but are moot in view of the new ground(s) of rejection. Since the new grounds of rejection were not necessitated by Applicant's amendment this Office action remains non-final.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 6,132,397 (Davis et al.) in view of U.S. Pat. No. 6,346,074 (Roth). Davis et al. disclose a method for using an occlusion catheter comprising the steps of creating an opening at an insertion point of the ascending aorta (col. 5, lines 6-8), inserting the occlusion catheter for the ascending aorta through the opening and fixing the occlusion catheter into the ascending aorta (col. 5, lines 9-12), placing the balloon in a proper indwelling position and inflating the balloon to occlude the ascending aorta (col. 5, lines 19-28), and releasing a cardiac muscle protective drug from a drug release aperture located at the leading end (fig. 2) of the catheter to deliver the cardiac muscle protective drug in the vicinity (fig. 1) of a coronary ostium (col. 5, lines 30-34) but lacks an incision being made in the chest and a dilator being used to open the incision. Roth teaches a method of using an occlusion catheter in the heart comprising the steps of making an incision in the chest of the patient (col. 13, lines 26-31) and expanding the opening with a dilator

(90). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the method of using an occlusion catheter of Davis et al. by making an incision in the chest and using a dilator to open the incision as taught by Roth in order for the surgeon to be positioned closer to the heart of the patient so that the surgery can be less invasive.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John K. Fristoe Jr. whose telephone number is (571) 272-4926.

The examiner can normally be reached on Monday-Friday, 7: 00 a.m-4: 30 p.m.
